

You want to grow your business, not your administration processes. Our customizable software is the answer as your business rules will be enforced uniformly and the reports created in the format you require.

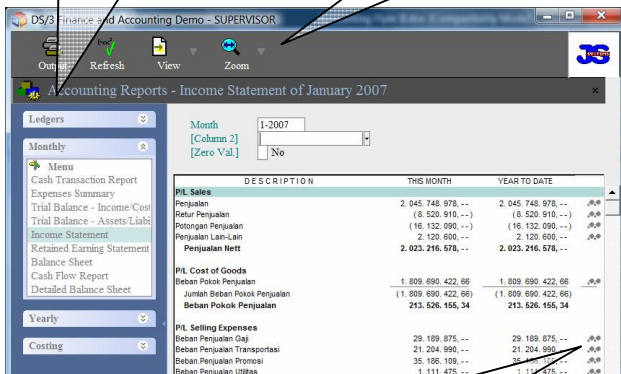

JS Systems avoids the pitfalls of tailor-made software by having a stable software platform and a proven set of standard settings. After that it is up to you which business rules and reports you want to add. All customization is included in our fixed price contract.

Financial Reporting

Income statement, Balance Sheet, Cash Flow Reports, Ledgers and Sub-ledgers are all quickly available at the click of a mouse button and include all the latest changes. All reports can online trace to more detailed reports and even the original transaction. The format of each reported is updated as you add more accounts or other master data.

The navigation pane lets you easily find the data and action you need.

The toolbar has buttons for all possible actions on the data shown.

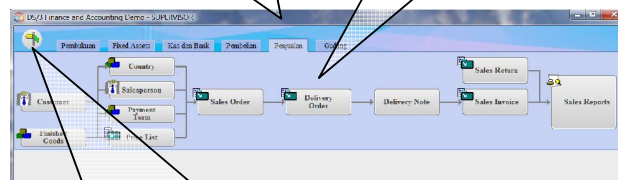

Click here to view detailed information about this item.

Sales to Cash

The software from JS Systems enormously helps your marketing and sales department by tracking sales orders and providing instant information about each customer. In the process all data for the accounting department is collected, removing the need for double entry and additional checking.

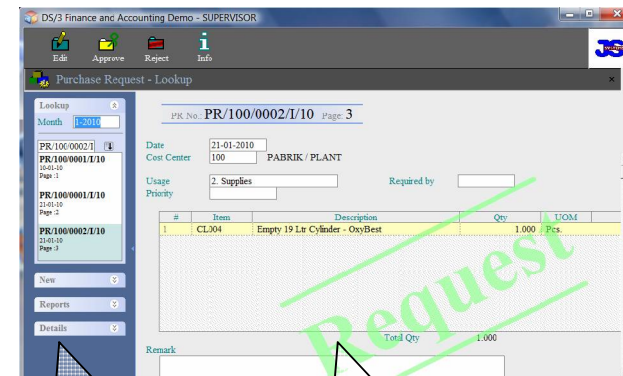

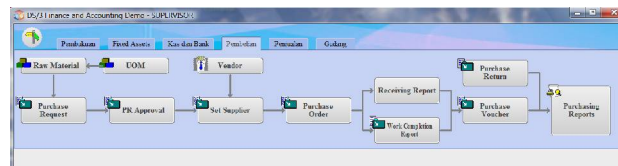

Each tab contains a flowchart with the actions for the department. Eg. You can only create a delivery order based on sales orders.

Find a form by name, search all text in the database or do maintenance. It's all behind this button.

Procurement to Payment

Improve control over budget and purchases and at the same provide required data for warehouse control and accounting. Because purchasing is performed more timely you can save money on inventory and make accurate cash flow predictions.

Lookup, New requests and reports are all here.

Review the transaction with status clearly shown.

Warehouse management

All the required information is here. Why not extent the system to your warehouse and improve the accuracy of your inventory reports.

More Subsystems

Fixed assets, petty cash, bank consolidations and specialized sub-ledger are all possible. Please request the product catalogue for more information.

Based on DS/3 Platform

- Modern user interface
- Advance security and reliability
- Future proof design
- Fully customized forms and reports
